

## **AsciiDoc Browser Extension Installation Procedure**

## 1 Introduction

This procedure explains how to install the [AsciiDoctor Browser Extension](#).

## 2 Procedure

### 2.1 Installation

Follow instructions here: <https://github.com/asciidoctor/asciidoctor-browser-extension>

### 2.2 Customize attributes

You can configure the plugin with your own variables to personalize these documents. You should also configure **Safe mode** to be `unsafe`.

```
adoc config
```

Prefix a space with a backslash to put a space between your first and last names.

As a test, these are what your attributes are set to:

```
reader-code XXX
```

```
reader-fullname User
```

```
reader-givenname User
```

### 2.3 Add the stylesheet

The JUXT stylesheet can also be added.

<https://raw.githubusercontent.com/juxt/asciidoctor-stylesheet-factory/master/stylesheet/juxt.css>
